Who We Are

Founded by Damien Waller, Edward Alder, and Grant Austin, **pay.com.au** was born from a simple vision: to help business owners turn everyday expenses into powerful rewards.

The founders saw a major gap — while individuals earned points on personal spend, businesses were missing out. Payments to the ATO, landlords, or staff often went unrewarded due to card limits, clunky systems, or a lack of tools to maximise points.

Drawing on deep expertise in payments, rewards, and digital innovation, the team built an end-to-end platform designed for Australian businesses.

> *"Since we launched in 2020, we have helped thousands of businesses process billions in payments, unlocking incredible rewards along the way."*
